EDUCATION

B.Tech, Computer Science and Engineering (AI & ML)

St. Martin's Engineering College

CGPA: 7.62 2020-2024

Intermediate

Narayana Jr College

84.1% 2018-2020

SSC

Narayana High School

CGPA: 8.2 2018

SKILLS

- **Programming Languages:** Python, JavaScript, Java
- **Frameworks:** ReactJS, TensorFlow, Bootstrap, Tailwind CSS, NLP
- **Tools:** Git, GitHub
- **Other:** Machine Learning, Data Analysis, GenAI, Prompt Engineering

LANGUAGES

- ENGLISH (Proficient)
- TELUGU (Native)
- HINDI (Proficient)

SUMMARY

Recent B.Tech graduate in Computer Science and Engineering (AI & ML) with practical experience in full stack development and machine learning through internships at IBM and Skibble. Proficient in MERN stack, ReactJS, and CSS frameworks. Skilled in managing multiple projects and collaborating effectively within teams. Eager to leverage technical skills and academic knowledge to contribute to innovative projects in a dynamic environment.

WORK EXPERIENCE

Front end developer intern

June 2023 – July 2023

IBM, Remote

- Utilized Tailwind CSS and Bootstrap CSS frameworks to refine UI elements and ensure responsiveness across devices, gaining valuable experience in modern web development practices.
- Played a key role alongside other interns in integrating Ant Design charts into the application for visualizing energy consumption reports.
- Together with fellow interns, explored various CSS frameworks and charting libraries throughout the project.

MERN Stack Developer Intern

Mar 2023 - Aug 2023

Skibble, Remote

- Developed responsive web applications using the MERN stack, gaining extensive hands-on experience with MongoDB, Express.js, React.js, and Node.js.
- Managed multiple projects simultaneously, showcasing exceptional time management and organizational skills. Consistently delivered high-quality work within deadlines by actively seeking guidance from senior developers.
- Participated in the entire development lifecycle of web applications, from conceptualization to deployment. Contributed innovative ideas and quickly adapted to new technologies, fostering a dynamic and productive work environment.

PROJECTS

To-Do-List

- Created a to-do list application using React JS, prioritizing a clean and user-friendly interface to streamline task management and productivity.
- Utilized front-end technologies proficiently to develop and deploy the to-do list application, contributing to an efficient and visually appealing solution for task tracking and completion.

AI Based Detecting Deception in Online Interactions: An Analysis of the Dishonest Internet Users

- Developed "AI Based Detecting Deception in Online Interactions" using RNN, Tensorflow, and NLP to analyze dishonest internet users.
- Applied RNNs to identify deceptive patterns in online interactions, enhancing deception detection accuracy.
- Leveraged Tensorflow and NLP for data preprocessing, contributing to improved online trust and security measures.
